

What our customers have to say...

- “ My son was making twisting tongue movements after few sessions. His tantrum also lasted shorter than usual.
- “ My son's babbling has improved tremendously so I think the machine is fine.
- “ Overall experience is good. Now it takes us only 30 minutes max to complete this at home. Earlier we had to spend around 3 hours in this process.
- “ My son has made a lot of progress. He is making lips movements of words he wishes to say.

Features:

- Two versions: EKKO - Portable and EKKO - Clinic

EKKO

Transforming Disability into Possibility

EKKO
THE WAVE THERAPEUTIC DEVICE

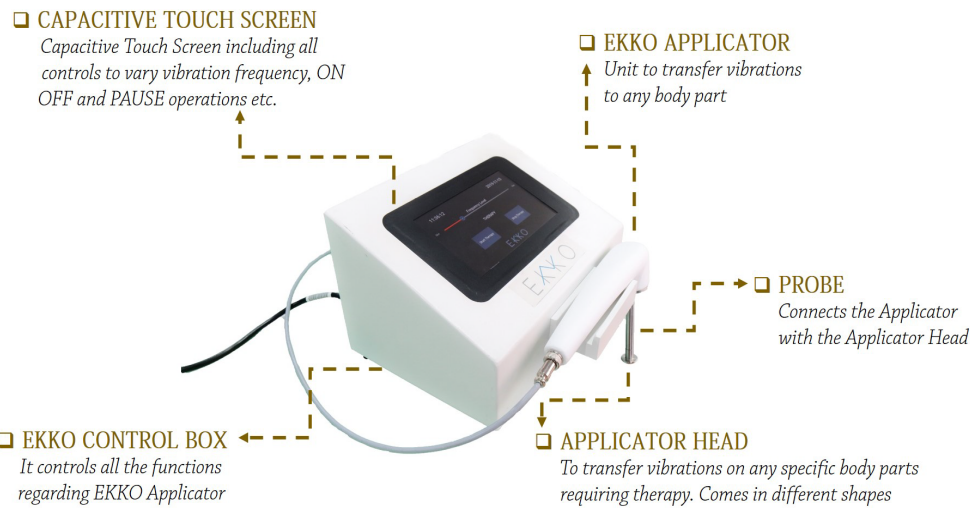

Committed to helping your child to reach full potential

Neurological Diseases are most common amongst children.

A Wave Therapeutic Device

EKKO-A Wave Therapeutic Device proposes a new solution using ultra - low frequency waves. The treatment is based on neuro - transmission cognitive theory.

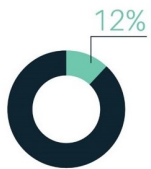

Clinical trials have proven EKKO efficacy to overcome symptoms like tongue dysarthria, motor speech aphasia / disphasia, tongue apraxia, facial palsy, fine motor movements, drooling and chewing disorders and slow cognitive development
